

Industrial Angle Shelving

Industrial Angle Shelving has been developed from the original 'British Standard' Shelving - a system tried and trusted over many years.

Whilst retaining the best features of British Standard Shelving - for example, loading capabilities and compatibility of components - Industrial Angle provides you with competitive storage solutions from a basic product range.

You can choose from:

- 2 Types of shelving upright - to cater for all loading requirements.
- Shelves available in a wide range of sizes.
- Simple bays or multi-tiered structures - to meet your requirements.
- With the choice of varying load capacities, Industrial Angle allows you to maximise storage efficiency whilst keeping costs competitive.
- Industrial Angle is compatible with other British - Standard 'type' shelving systems, allowing components to be interchanged.
- Standard colour is Light Grey (GW).
